

PC-Program MCRead

For WINDOWS

Instruction for use 9.1701.00.016 / ...017

General

The program **MCReadWin.EXE** enables you to read data from a memory card and to store them in files. The data are written from a Datalogger into the memory card, and are stored in files on your PC by means of a reading device and **MCRead**.

The PC-Program **MCRead** is suitable for the following platforms:

- Windows 95
- Windows 98
- Windows NT
- Windows ME
- Windows 2000
- Windows XP

Installation

The following variants are assisted for the installation:

- Installation from floppy disc
- Installation from CD

Installation from floppy disc:

Please insert the floppy disc with the label "SETUP" into the drive and start the program SETUP.EXE. Follow the instructions of the installation program..

Windows NT: Please take into consideration that, for the installation, you have to be registered as ADMINISTRATOR .

Installation from CD:

Please insert the CD into your CD-ROM drive. The installation is started automatically . Follow the instructions of the installation program..

Windows NT: Please take into consideration that, for the installation, you have to be registered as ADMINISTRATOR.. Later, the program can be operated by every user.

First Steps

After the installation please connect the memory-card-reading device to your computer, and put a memory card into the respective holder.

Please close all outstanding print jobs on your PC.

Please start the PC-Program „**MCRead**“ through the starting board „programs“ „Thies Klima“ „McReadWin“. After the call-in the memory card is automatically recognised, and the information of the data records are read and indicated.

Please select the entry "read data" from the menu "commands". You will enter into a dialogue that helps you with the data selection. Activate the entry "read data", and actuate the dialogue with "OK". The data are now written into the mentioned file..

For further information please actuate "F1" in the program in order to use the help.
